1. What It Is

A 3 to 5 week engagement that gives medium-sized organisations strategic clarity before investing in new software, transformation projects, or tech upgrades.

No vendor sales. No complexity. Just practical answers to:

- What's working?
- What's not?
- What should we do next?

2. Common Problems It Solves

We're a great fit when:

- Systems are outdated, fragmented, or manually driven.
- Internal teams are overwhelmed or unsure where to start.
- No one's clear on what tech to invest in (or avoid).
- Leadership needs a practical, staged plan—not a software pitch.
- Previous projects lacked clarity or momentum.

3. What Clients Get

- Pre-work + stakeholder interviews
- Executive deck + detailed report
- A phased roadmap showing strategic priorities
- Delivered in 3 - 5 weeks, fixed price, no surprises
